

4. Consider the following Service Object in the file `services/apiService.js`. Once imported, how would you incorporate the list of orders into a Vue component?

import axios from 'axios';

```
const http = axios.create({
  baseURL: "http://localhost:5000"
});
```

```
export default {
  listOrders() {
    return http.get('/orders');
  },
  getOrder(id) {
    return http.get('/orders/${id}');
  }
}
```

- A ~~this.orders~~ apiService.listOrders();
- B apiService.listOrders().then(apiOrders) => {
 this.orders = apiOrders;
};
- C const apiOrders = apiService.listOrders();
this.orders = apiOrders.response;
- D const apiOrders = apiService.listOrders().get();
this.orders = apiOrders;

5. Consider the following Service Object in the file `services/apiService.js`. Once imported, which option below allows you to retrieve the order details for a specific `order.id` in a Vue component?

import axios from 'axios';

```
const http = axios.create({
  baseURL: "http://localhost:5000"
});
```

```
export default {
  listOrders() {
    return http.get('/orders');
  },
  getOrder(id) { ←
    return http.get('/orders/${id}');
  }
}
```
